Math : TIME & DISTANCE

[Join Us](#)

Formulas:

$$\text{Speed} = \left(\frac{\text{Distance}}{\text{Time}} \right),$$

$$\text{Time} = \left(\frac{\text{Distance}}{\text{Speed}} \right),$$

$$\text{Distance} = (\text{Speed} \times \text{Time})$$

$$x \text{ km/hr} = \left(x \times \frac{5}{18} \right) \text{ m/sec}$$

$$x \text{ m/sec} = \left(x \times \frac{18}{5} \right) \text{ km/hr}$$

If the ratio of the speeds of A and B is $a : b$, then the ratio of the times taken by them to cover the same distance is $\frac{1}{a} : \frac{1}{b}$ or $b : a$.

Suppose a man covers a certain distance at x km/hr and an equal distance at y km/hr. Then, the average speed during the whole journey is $\left(\frac{2xy}{x+y} \right)$ km/hr.

Q1.

A train travels 82.6 km/hr. How many metres will it travel in 15 minutes?

(E.S.I.C., 2006)

HeMantra.com

Q2.

. How many minutes does Aditya take to cover a distance of 400 m, if he runs at a speed of 20 km/hr?

HeMantra.com

Q.3.

. A cyclist covers a distance of 750 m in 2 min 30 sec. What is the speed in km/hr of the cyclist?

HeMantra.com

Q.4.

A man walked at a speed of 4 km/hr from point A to B and came back from point B to A at the speed of 6 km/hr. What would be the ratio of the time taken by the man in walking from point A to B to that from point B to A?

HemMantra.com

Q5. A man walked at a speed of 4 km/hr from point A to B and came back from point B to A at the speed of 6 km/hr. Find the average speed?

HeMantra.com

Q6.

Peter can cover a certain distance in 1 hr. 24 min. by covering two-third of the distance at 4 kmph and the rest at 5 kmph. Find the total distance.

HeMantra.com

Q7.

. A man travelled from the village to the post-office at the rate of 25 kmph and walked back at the rate of 4 kmph. If the whole journey took 5 hours 48 minutes, find the distance of the post-office from the village.

HemMantra.com

Q. 8.

An aeroplane flies along the four sides of a square at the speeds of 100, 200, 300 and 400 km/hr. Find the average speed of the plane around the field. (P.C.S., 2009)

HeMantra.com

Q9. The ratio of the speeds of X and Y is $2 : 5$. X takes 30 seconds to cover a certain distance. How many seconds will Y take to cover the same distance ?

HeMantra.com

Q 10. A bus travels a distance of 20 km at a speed of 10 km/hr and a distance of 30 km at a speed of 15 km/hr, then find the average speed of the bus during the entire journey ?

HemMantra.com

Q 11. A bus travels from Jaipur to Delhi at a speed of 75 km/hr and returns back on the same route at a speed of 60 km/hr. If it takes 40 minutes more in the return journey. Then find out the distance from Jaipur to Delhi ?

HemMantra.com

Q 12. A student traveling at 5 km/hr reaches school 12 minutes late. If he travels at 6 km/hr. He reaches school 3 min early. Find the distance of school from home.

HeMantra.com

Q 13. A thief committed a theft at 10 pm. He ran at a speed of 10 km/hr. The police chased the thief 15 min after the theft at a speed of 15 km/hr from the crime scene. When did the police catch the thief ? what distance was it caught?
